ACKNOWLEDGEMENT

Purpose of acknowledgements page is to show appreciation to those who contributed in conducting this dissertation work / other tasks and duties related to the report writing. Therefore when writing acknowledgements page you should carefully consider everyone who helped during research process and show appreciation in the order of relevance. In this regard it is suitable to show appreciation in brief manner instead of using strong emotional phrases.

In this part of your work it is normal to use personal pronouns like "I, my, me" while in the rest of the report this articulation is not recommended. Even when acknowledging family members and friends make sure of using the wording of a relatively formal register. The list of the persons you should acknowledged, includes guide (main and second), academic staff in your department, technical staff, reviewers, companies, family and friends.

You should acknowledge all sources of funding. It's usually specific naming the person and the type of help you received. For example, an advisor who helped you conceptualize the project, someone who helped with the actual building or procedures used to complete the project, someone who helped with computer knowledge, someone who provided raw materials for the project, etc.

Abstract

Most difficult and important component of report/seminar is to write abstract. Presented at the beginning of the report, it is likely the first substantive description of your work read by an external examiner/reader. You should view it as an opportunity to set accurate expectations. The abstract is a summary of the whole seminar work.

It presents all the major elements of your work in a highly condensed form. An abstract often functions, together with the project title, as a stand-alone text. An abstract is not merely an introduction in the sense of a preface, preamble, or advance organizer that prepares the reader for the report.

In addition to that function, it must be capable of substituting for the whole report when there is insufficient time and space for the full text. The final version of the abstract will need to be written after you have finished reading your report for the last time. However, if you think about what it has to contain, you realize that the abstract is really a summary of your project/seminar work.

Your abstract should answer specific questions: What was done? Why was it done? How was it done? What was found? What is the significance of the findings?

LIST OF TABLES

CHAPTER 1

INTRODUCTION TO Seminar Topic

1.1   Introduction to Seminar

Students are expected to write brief introduction of the Seminar topic.
.

1.2   Motivation behind seminar topic

Students are expected to write "Why they thought about this Seminar". They could also explain the "Explain need of the Seminar". Any statement which motivated to take up this seminar topic.

1.3   Objective(s) of the work

Seminar objectives tell the "How" of the Seminar aim. You want to achieve your goal and the objectives state how this will be done – what major tasks will be undertaken and what your major targets are. Most projects will have between six and nine objectives. A Seminar objective is usually a statement starting with the words "To…"

Objectives are subsidiary to aims and are the steps you are going to take to answer your problem statement or a specific list of tasks needed to accomplish the goals of the Seminar This must be highly focused and feasible and should address the more immediate Seminar outcomes

Guide must personnel check these aim and objectives and make students write these statements properly.

CHAPTER 2

LITERATURE SURVEY OF Seminar Title/Topic

Students are expected to write similar or related work already done by various researchers. They could also explain existing tools/technologies in this section. There advantages and disadvantages of each method or technique. They should also explain how their project is different from those existing systems. You need to read lot of books/ papers/ magazines for making this survey.

CHAPTER 3

SEMINAR RELATED OTHER CHAPTER

All other details of seminar topic chapter-wise if necessary including methodology/algorithms, advantages and disadvantages, applications, enhancements could be added.

CHAPTER 4……….onwards add chapter no and name

CONCLUSION

Conclusions usually serve two functions. The first is to summarize and bring together the main areas covered in the writing, which might be called "looking back" . The second is to give a final comment of your seminar.

For example your could say this seminar is undertaken to explain...... and evaluate ..... . This study has found that generally .... Or In this seminar we …………..
